Cut Width mm	1100	1100	1400	1700

KEY: C (Centre) L (Left) R (Right) Y (Yes, standard) - (Not Available) O (Optional Extra) Specifications may change without notice

Features	
One piece body sheet, clean top	No collection points for grass and debris. Simple cleaning
3-degree, slope in body sheet	Adds to the ease of keeping the body free of debris and water lying on the body
Hot dip galvanized body	Galvanizing* keeps your slasher body in good order for many years of service
Strong headstock and chain backstays	Allows the slasher to follow the ground contour
Central and Offset mounting	Allows the slasher to be set in either Central, Left or Right offset
Double leg headstock mounting	Unlike some other brands, the tower headstock is held securely by a clevis mounting bracket. This eliminates the strain on the pivot bolt
Reinforced headstock mounting gussets	Hidden inside the body design and combined with the strong body sheet to ensure a rigid and strong fixing point for the headstock and backstays
Bolt-on Chain guards	Easy to repair when damaged, bolted on giving added strength to the leading edges
Skids reversible	Reversible and a slow 200mm radius front and rear leading edge keeps the skid from digging to help the slasher ride over irregularities on the ground
Skid adjustment plates	Adjusting plates give the skids 3 positive-lock height positions so you don't have to rely on just friction or aligning bolts and holes

* Galvanizing may display a bright sheen through to a dull or matt grey finish. The colour, luster or texture does not effect the coating.
